SUMMARY

I am software engineer Graduate with strong skills in Python, C, and web development. Experienced in building projects involving machine learning, data management, and automation. Passionate about learning emerging technologies like AI and cloud computing, with excellent problem-solving and communication abilities. Eager to contribute to innovative software solutions and grow as a professional developer.

EDUCATION

B.E-Computer Science

Srinivas Institute of Technology

CGPA

8.64/10

Pre-university course- PCMB

Government PU college

GRADE

84%/100%

SSLC

Bangalore Public School

GRADE

87%/100%

PROJECTS

Handwriting and Text Analyser ML | OpenCV

This project focuses on identifying and interpreting handwritten text. Implemented a handwriting and text analyser using machine learning and computer vision. Illustrated concepts and usage of handwriting evaluation.

Full Stack Web Application – HR Portal

Designed and developed a full-stack web application with modules for job posting, candidate registration, and interview slot booking. Built responsive user interfaces and integrated backend logic to streamline the hiring process.

Land records secure using Blockchain Technology | Data Integrity | smart contracts

This project aims to develop a secure and transparent land record management system using blockchain technology. Ensure data integrity, immutability, and fraud prevention in land transactions through blockchain integration.

INTERNSHIP

Android Development Intern | MindMatrix Technologies (January 2026-May 2026)

Completed an Android Development Internship at MindMatrix Technologies, where I developed mobile applications using Kotlin, XML, and Android Studio. Developed and tested real-world projects, including Grama-Vaxi, an offline livestock vaccination management application with reminder notifications.

SKILLS

Programming Languages: C, Python, Java. **Database:** Oracle SQL, MongoDB, NoSQL

Web Technologies: HTML, CSS, JavaScript, ML, ReactJS, NodeJS.

Tools & Technologies: AWS, Jenkins, Docker, Git.

CERTIFICATIONS

- AWS cloud virtual internship
- Python Essentials 2
- NoSQL-MongoDB - IBM
- AI-ML Virtual Internship
- ReactJS-Infosys Springboard
